Lonere, Dist. Raigad, Pin 402103, Maharashtra

A

PROJECT REPORT ON

"AI - CAR MARKETPLACE SYSTEM"

Under the Guidance of

Prof. P. S. Umate

Submitted by

Mayuri Sable (Roll No:CS4134)

Vaishali Susundre (Roll No:CS4135)

Divya Mahajan (Roll No:CS4147)

For the partial fulfillment for the award of

BACHELOR OF TECHNOLOGY

IN

COMPUTER SCIENCE & ENGINEERING

CSMSS

CHH. SHAHU COLLEGE OF ENGINEERING

Chhatrapati Sambhajinagar – 431011

(2025-26)

CSMSS

Chh. Shahu College of Engineering,

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

CERTIFICATE

This is to certify that the Project report entitled

"AI - CAR MARKETPLACE SYSTEM"

Submitted by

Mayuri Sable (Roll No:CS4134)
Vaishali Susundre (Roll No:CS4135)
Divya Mahajan (Roll No:CS4147)

in partial fulfillment for award of the Degree **Bachelor of Technology** in **Computer Science and Engineering** of **Dr. Babasaheb Ambedkar Technological University**, Lonere, Raigad, during academic year 2025-26 Part-I.

Prof. P. S. Umate	**Dr. S. P. Abhang**	**Dr. G. B. Dongre**
Guide	**Head of the Department**	**Principal**

DECLARATION

We, the students enrolled in the seventh semester of the B.Tech program in **Computer Science and Engineering** at CSMSS Chh. Shahu College of Engineering, Chhatrapati Sambhajinagar, hereby asserts that our project work titled "**AI-CAR MARKETPLACE SYSTEM**" submitted to Dr. Babasaheb Ambedkar Technological University, Lonere, Raigad, during the academic year 2025-26, represents original research conducted by us.

This project work is presented as a partial fulfillment of the requirements for the Bachelor of Technology degree in **Computer Science and Engineering**. The findings presented in this report have not been previously submitted to any other University or Institute for the purpose of obtaining any degree.

Roll No.	Name of the student	PRN No.	Signature
CS4134	Mayuri Dinkar Sable	2225331242037	
CS4135	Vaishali Sanjay Susundre	2225331242038	
CS4147	Divya Pavan Mahajan	2225331242051	

Place: Chhatrapati Sambajinagar

ACKNOWLEDGEMENT

We take immense pleasure in presenting this project report, as this page provides us with the opportunity to convey our heartfelt emotions and gratitude.

We extend our sincere thanks to our guide, **Prof. P. S. Umate**, whose guidance was invaluable at every step of this project. His motivation and confidence-boosting efforts were instrumental, and we acknowledge that this work would not have been possible without his/her support and encouragement.

Special appreciation is also extended to the project coordinator, **Dr. G. J. Sahani**, for guiding and motivating us throughout the project. We would like to express our gratitude to the Head of the Department, **Dr. S. P. Abhang**, and the respected Principal, **Dr. G. B. Dongre**, for providing valuable resources and dedicating their valuable time to review our report.

Finally, we express our thanks to all the staff members of the **Computer Science and Engineering Department** and our friends, without whom the completion of this project would not have been possible.

Mayuri Sable (Roll No:CS4134)
Vaishali Susundre (Roll No:CS4135)
Divya Mahajan (Roll No:CS4147)

Bachelor of Technology (Computer Science and Engineering)

ABSTRACT

People are more or less familiar with buying and selling cars, but have not really experienced car renting or servicing system online in Bangladesh. Therefore, the initiative to make a system that includes renting and servicing system, along with buying and selling, which is a rare scenario in this country. This project can turn out to be a game changer in the car trading business if properly executed. Car Trading and Rental system is a system to provide service to the people, who want to buy, sell and rent a car. In Bangladesh, there is no dedicated system with all the functionalities for Buying, Selling, Renting and repairing of cars all together. It's an online marketplace where anyone can buy, sell or rent cars using this website and application. This system will help the users to rent cars when needed. It can also help user to give their idle car in rent which will give them an extra bit of income. They can also sell their used car to others. Users can also buy new or used car directly using this system in a cheaper way. This System has both Website and Android interface. Customers can use both according to their purpose. This system can be a one stop solution for all car related problems.

In foreign countries, people rent cars for self-driving option but in this country it's not possible yet. Many people want to rent cars for a certain period of time and some people want to drive on their own. This system will be a good solution to them who wants to give rent their idle car in their available time at home. Again, people who want to rent a car wouldn't need to go to rental shops to rent cars. The goal is to make a simple system with helpful options with experts' advice for customers. Users can also buy car directly using this website or app in a cheaper way. They can also sell their used car to others.
